

ALMEDIN AGIC

Clinton Twp, Michigan

almedinagic@outlook.com | [linkedin.com/in/almedinagic](https://www.linkedin.com/in/almedinagic) | github.com/Zyorby | agic.dev

EDUCATION

Oakland University

B.S. in Cybersecurity - GPA - 3.2

08 2024 – 05 2028

Rochester, Michigan

EXPERIENCE

Nexteer Automotive

IT Student Co-op

07 2026 – Current

Auburn Hills, Michigan

Roosen Varchetti Olivier

IT Intern

09 2023 – 05 2024

Clinton Twp, Michigan

- Provided Tier 1 technical support to end-users, resolving hardware, software, and network issues across 50+ workstations
- Managed Active Directory accounts, including password resets, permission updates, and user onboarding/offboarding
- Maintained and updated Windows systems, ensuring timely patches and software compliance
- Assisted with basic cybersecurity practices, including phishing email reporting and endpoint monitoring
- Documented troubleshooting procedures and created user-friendly technical guides for common issues
- Set up new workstations, including hardware configuration, structured cable management, and custom network cable termination

PROJECTS

agic.dev — Personal Portfolio Site

2026

- Designed and built a personal portfolio site in TypeScript and React using Vite, deployed to production on Vercel
- Wrote fully typed data interfaces and passed strict TypeScript compiler checks and a clean production build
- Rebuilt the visual design around a consistent engineering-datasheet style, replacing an earlier version with visible defects

Hardware Security

In Progress

- Interface directly with embedded device circuit boards over UART serial connections using a Bus Pirate and probe cables
- Access device console output and root shells over serial to study firmware behavior and stored configuration data

Homelab

2025 – Current

- Proxmox homelab running dockerized services including Pi-hole DNS filtering, WireGuard VPN, reverse proxy, NAS, and media server
- Configured Cloudflare Tunnel for secure external access without exposing inbound firewall ports

Secure App Login

- Designed and implemented a secure login system for a password manager application using a master password architecture

"Cleaner" App

- Designed an app made for client side modding for an online platform on a video game

TECHNICAL SKILLS

Languages: Python, C, JavaScript, TypeScript, SQL, HTML, CSS

Technologies: Linux, Proxmox, Docker, React, Vite, Git, GitHub, Active Directory, Windows, WireGuard, Pi-hole, Cloudflare Tunnel

Hardware: Bus Pirate, UART serial interfacing, workstation hardware configuration, network cable termination

EXTRACURRICULAR

Cyber Patriots

Team Lead

01 2024 – 05 2024

- Led a team of tech enthusiasts in "hacktivist" competitions to achieve 2nd place in Michigan
